

## Cyclone Montego Torino REGISTRY UPDATE 10/16 covering 70-71

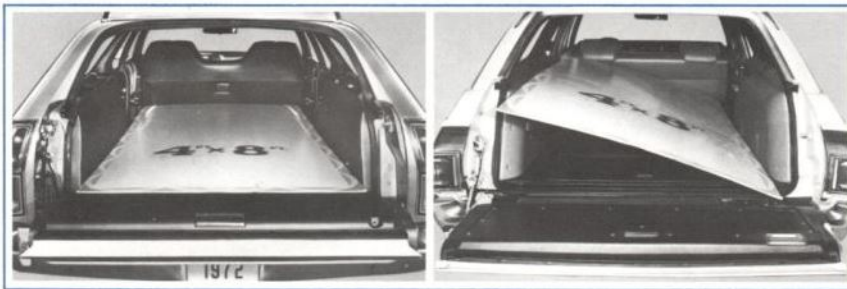

Note Executive pool sticker!

**Resto Tips:** NEW Battery tray support for 70-1 intermediates \$27 shipped, AND louver hinges to replace the ones that always break (mine did when it was only 7yrs old) Dan Mikolajczyk [postaldan@msn.com](mailto:postaldan@msn.com) (414) 801-1975

With the seats folded out of the way, Torino boasts more than eighty-three cubic feet of cargo space. And the area between the wheelhousings is so wide a big four- by eight-foot sheet of plywood slides in with ease.

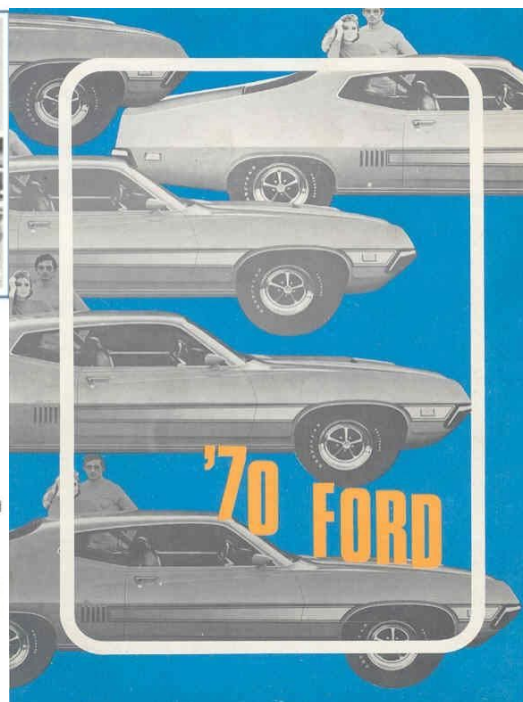

Now look at Chevelle and Torino Wagons side by side. You can get a four- by eight-foot panel into the Chevelle, all right, but don't try to get it to lie flat on the floor . . . the car just isn't big enough! A four- by-eight sheet goes into the Torino Wagon easily!

Torino is correctly described as being a step ahead of the competition. From its new body-frame construction to its sophisticated looks, Torino is the mid-size car to which others are compared.

When the permissible load gets too big to put *inside* of the spacious Torino Wagon, space-minded Torino owners go *outside* . . . to the practical rooftop luggage rack.

**Torino Squire . . .**  
**America's number one mid-size station wagon!**

Our noncar Cyclone is a series of fans.
